# Andrian Karsanashvili

## Personal Data

**Position:** Junior**+** Front-End Engineer

**Experience:** 2 years

**Age:** 20 years

**Location:** L'viv, Ukraine

**LinkedIn & GitHub:** /andrian-kars

**Codewars:** 350+ kata solved

## Soft Skills

- Adaptability
- Ability to fast-learning
- Analytical Understanding
- Attention to details
- Critical Thinking
- Good Communication and Teamwork
- Self-Confidence and &-Motivation
- Stress Management and Patience
- Flexibility

## Me, Myself & I

*I*'m a first-year Engineering student with more than a year of development experience. I have developed many big projects on my own or as a group member. I have used different technologies, mainly React, JavaScript, TypeScript, Node, etc. My code is always well structured with proper comments so that any child can easily follow along with it. Speaking of my team members, they love to work with me because of my friendly behavior and tremendous teamwork experience. I am also a great leader. Under my management, my team finishes on time.

*F*inally, I try to think of the targeted audience and code accordingly by fully understanding the flow and logic.

## Hard Skills

- React.js + Redux
- JavaScript
- TypeScript
- Git
- Node.js
- Rest APIs
- Algorithms and Data Structures
- HTML / CSS
- CSS preprocessors (SCSS / LESS)
- CSS framework 'Bootstrap'

# Education

- **Ivan Franko University** *2020 - 2024*
  *S*oftware Engineering

- **EPAM Front-End Winter** *2021*
  *S*trong Junior Front-End Engineer

- **React Way Of Samurai** *2021*
  *A*dvanced React + Redux + TypeScript

- **JavaScript 30** *2021*
  *J*avaScript quirks and features

- **OSF Academy** *2020*
  *T*rainee Front-End Developer

- **WebCademy** *2019*
  *H*TML Coder

- **School in Germany** *2016 - 2018*
  *A*ssociate Degree in Economics

# Experience

- **Social** *600 hours*
  *S*ocial Network was a part of the React Way Of Samurai course, and I was polishing it after finishing the course. The core is React + Redux. I also transitioned the whole project from JS -> TypeScript. Mainly there is a Social Network API (Rest API) used. The project constantly develops, and new features are being pushed.

- **The Dark Site** *100 hours*
  *T*he Personal Website was developed with TS, React & Redux. Lots of animation were developed and also used from open source. It contains a bunch of new features, and it is just great.

- **University Project** *4 months*
  *W*e have got six months to finish a final project. I was the leader of our team. Our project was finished two months faster and end up the best. Technologies used: gulp, sass, jquery, plugins, git.

- **Old Website** *50 hours*
  *M*y old personal site was used as Web CV. Technologies used: react, sass, javascript, git.

- **OSF Academy** *2 months*
  *W*hen I was attending a course at OSF Academy, I finished this project. It was my final project. I completed it 10 days earlier and better than others. In the end, I was offered a position in OSF Digital.

- **Other 70+ Projects** *1000+ hours*
  *T*here are many other smaller projects. They are my pet and also from finishing different courses.
